Turn left at Fred Taylor Drive – first stop light
Entrance to loading dock is first driveway on the right

Call 614.688.5999 if you need further help with directions

Columbus Area Map

Schottenstein Center Site Map

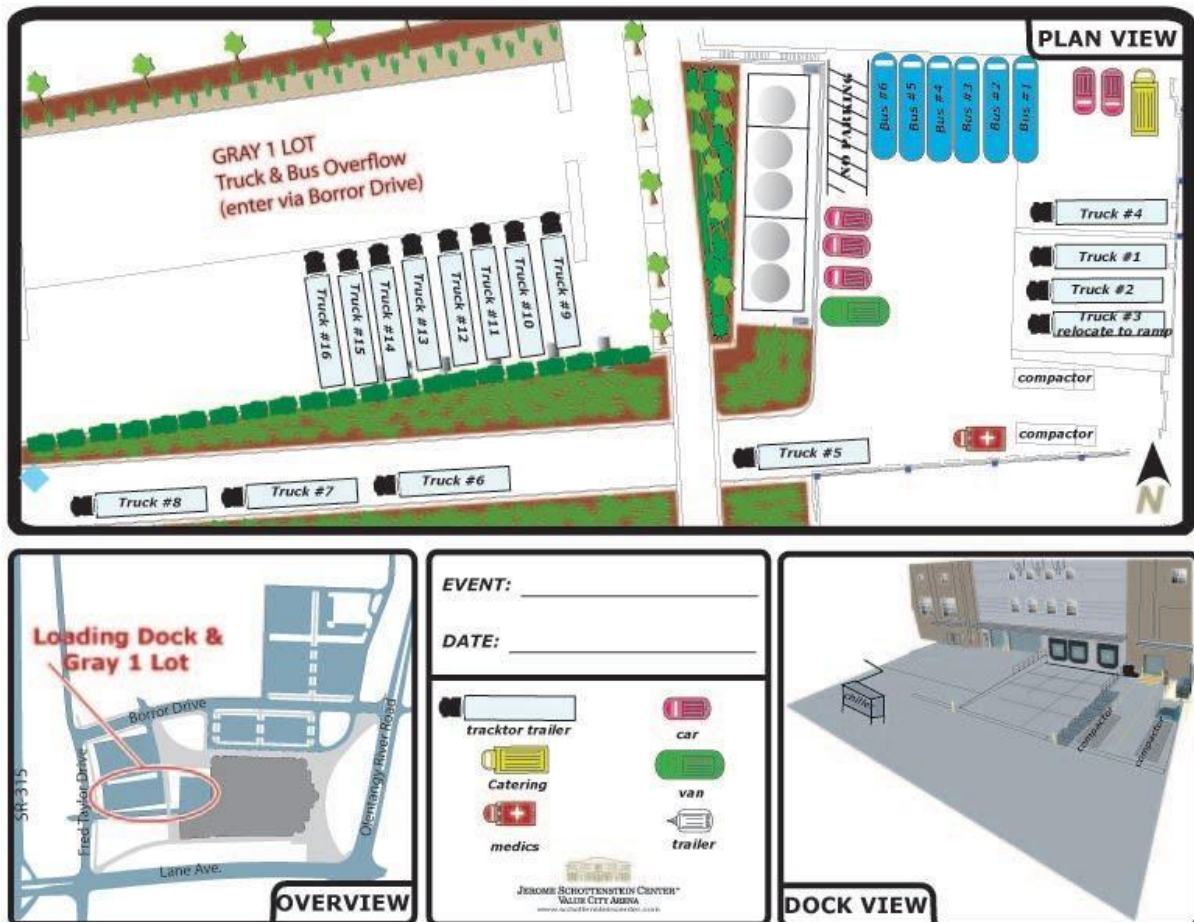

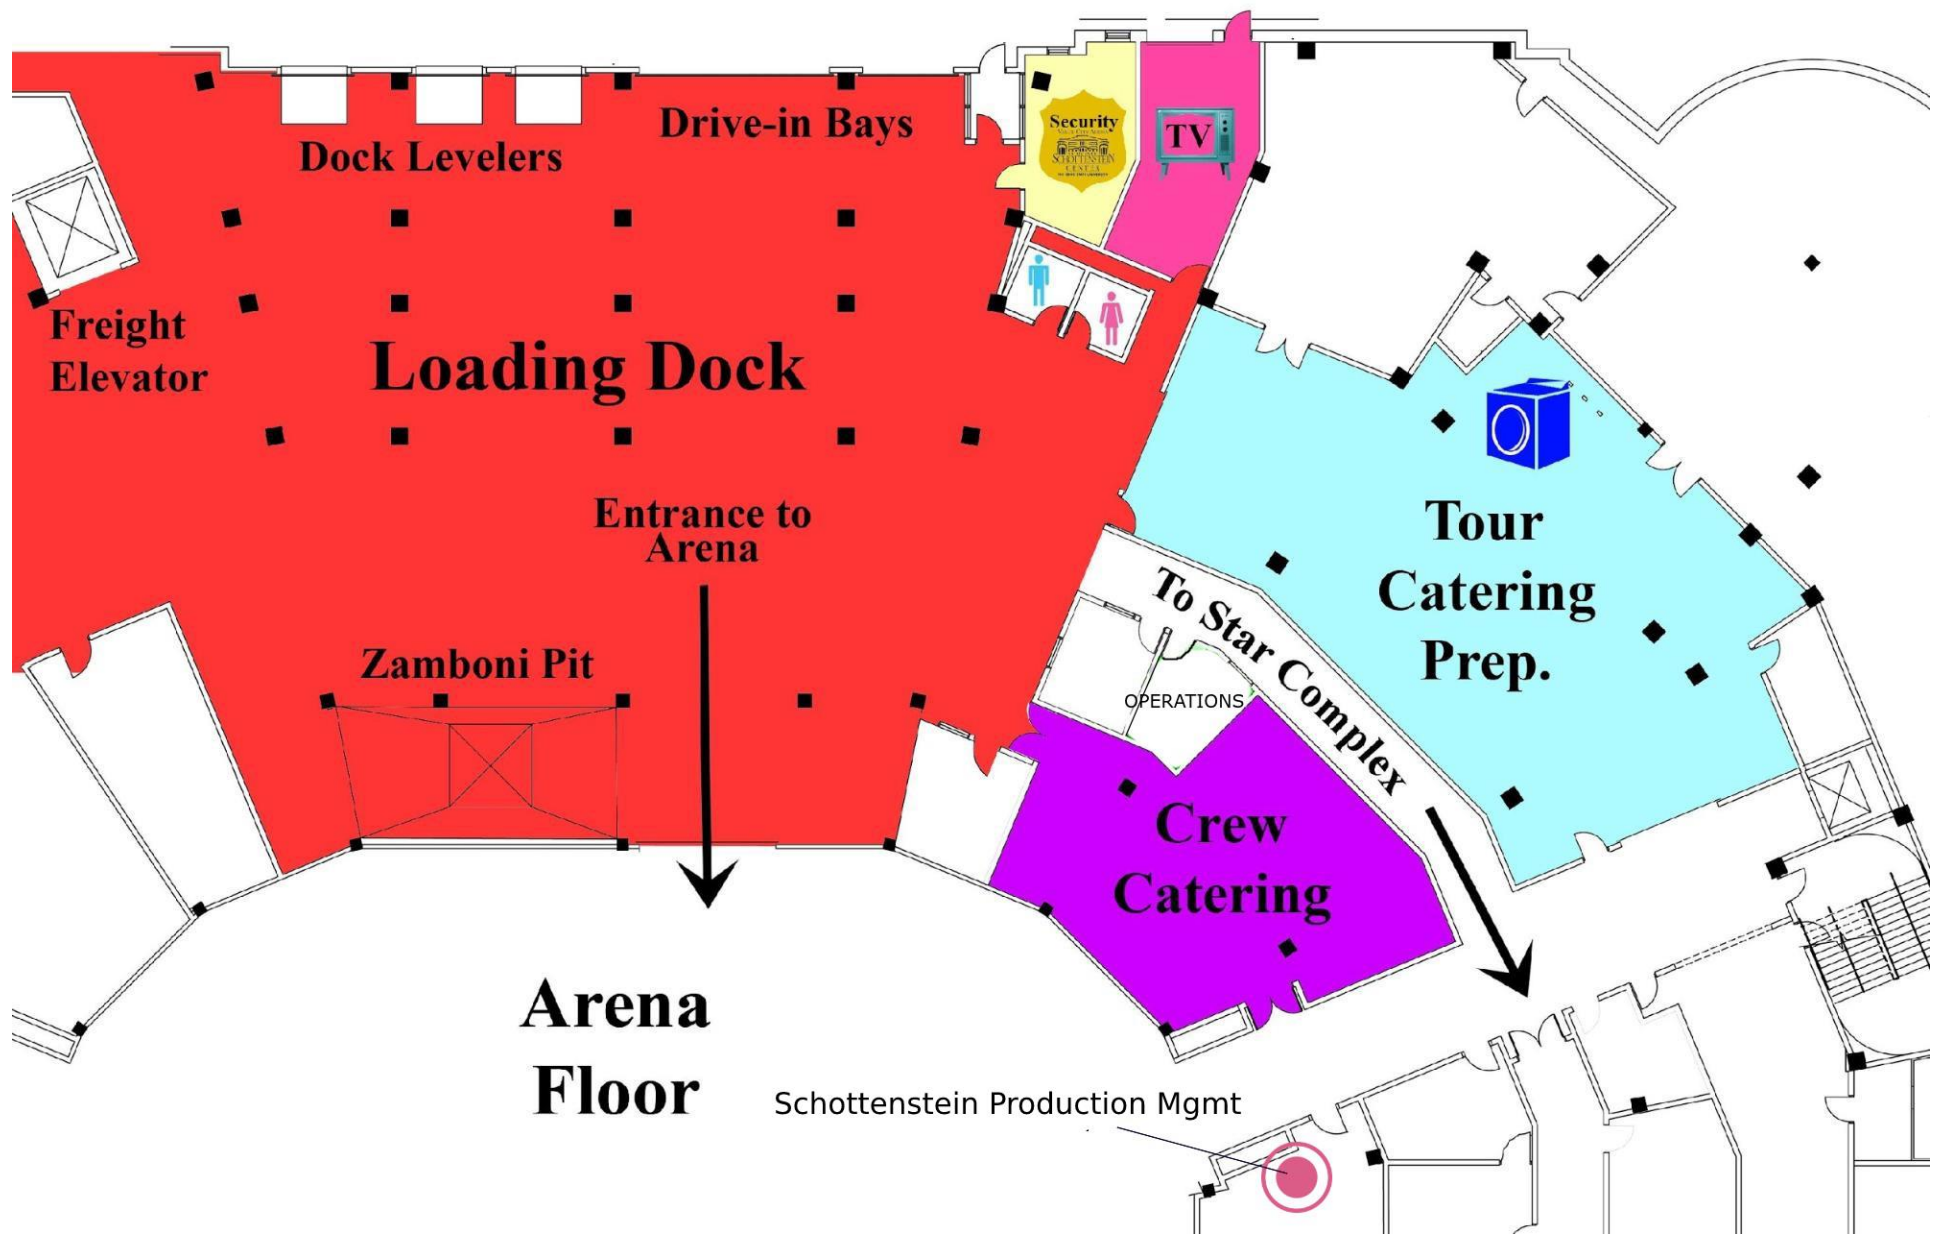

Loading In & Out and Onsite Parking

Our Loading dock is level with the arena floor with no ramps or obstruction. The covered area is climate controlled and utilizes an exhaust system with CO2 sensors to expel truck exhaust buildup.

- 3 covered docks with levelers
- 3 drive-in bays. One single 12'x14' and one doublewide 24'x14' opening with access to the arena floor.
- 100' to arena floor

Parking is available for all vehicles in the service court, immediately located outside the loading dock and backstage area. Shore power pedestals are available in the service court and the west parking lot (Grey One).

The ample space of our loading dock provides for quick load-in and load-out times while supporting large amounts of storage space for empty cases.

Our arena floor is a smooth and level transition from the loading dock with ample room for the largest of productions.

Room Information

Production Offices

The building has two devoted Production Offices available with an inner connecting door. Both are carpeted with phone, fax and data capabilities. In addition, we have a Media Room that makes for an excellent large office space, or meet-and-greet space with a separate inner-room.

Star Dressing Rooms

There are four Star Dressing Rooms. All are fully carpeted and include high quality furniture and have private bathrooms and showers. Each room is individually climate controlled and has cable, phone, fax, data and Clearcom capabilities. Dressing rooms B & C connect with double French doors to provide more versatility and setup options. All rooms also include smoke eaters which filter and recycle air in each room.

Flex Rooms

Four smaller rooms are available with phone and data capabilities across the hall from the Star Dressing Rooms. They can be used for anything from costume storage to tuning rooms.

Locker Rooms

There are four large locker rooms. These rooms can be converted into two larger rooms by removing the separating air walls.

Crew Catering

Located just off of the loading dock and across the hall from the production offices, our catering room seats 80 and is conveniently located close to the Tour Catering prep area.

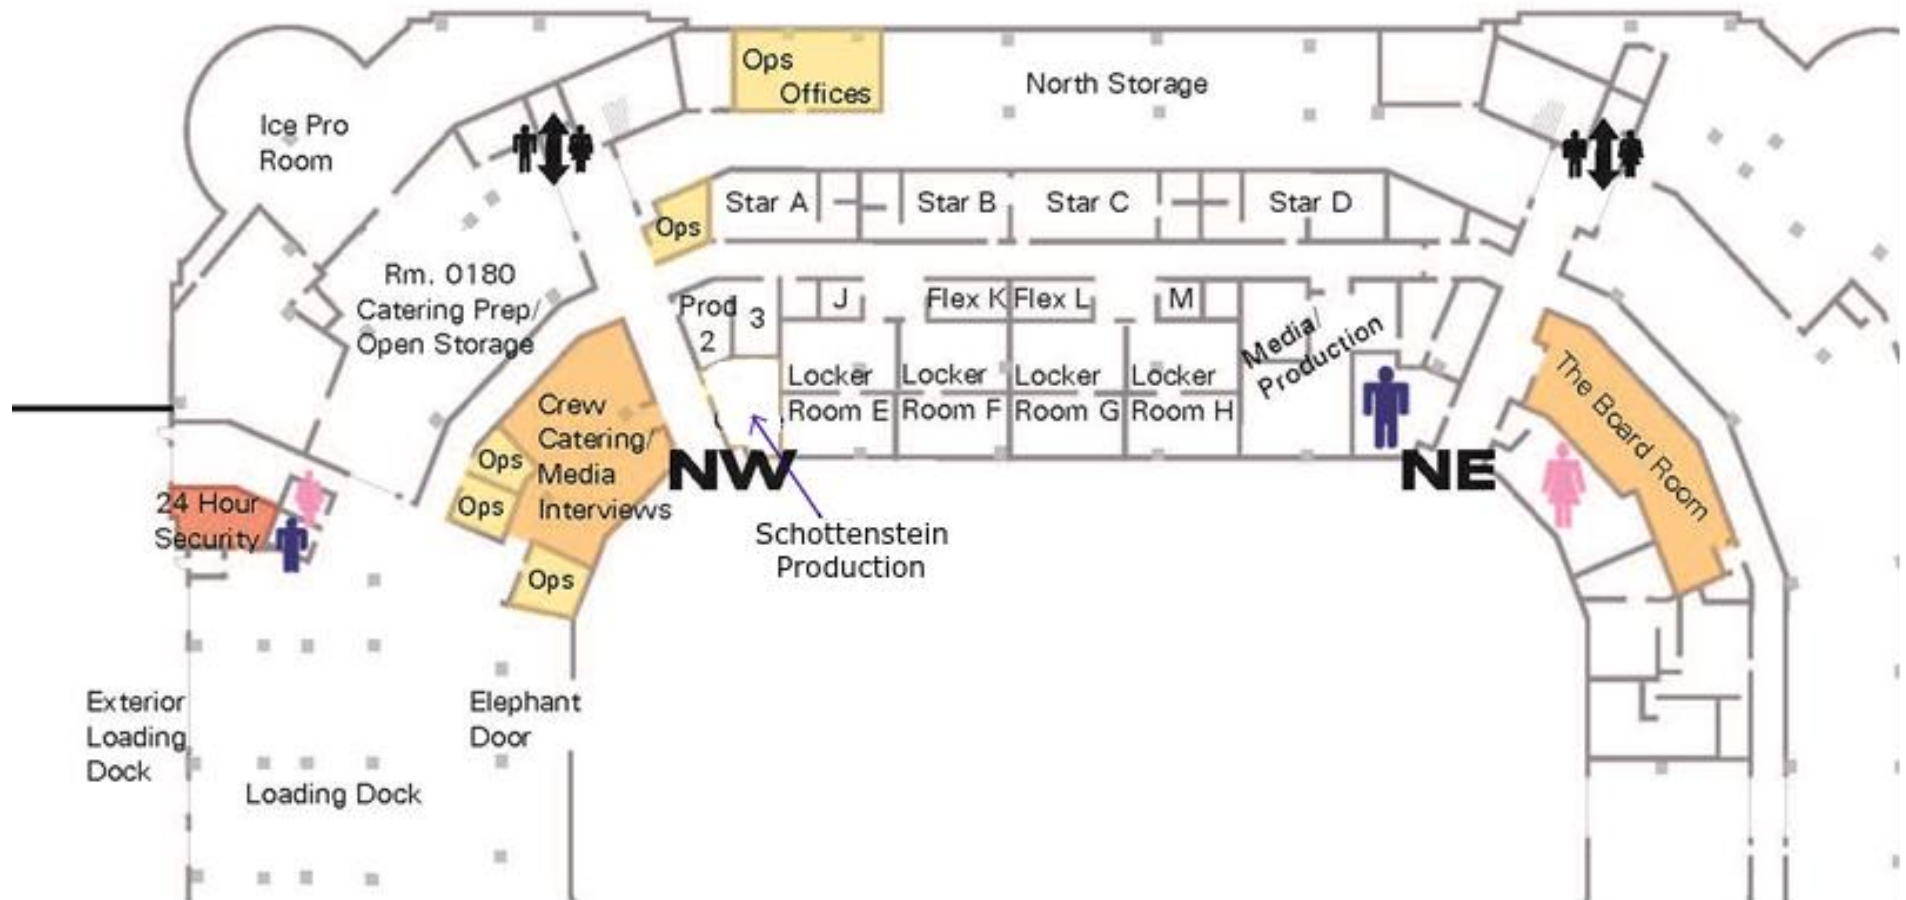

Laundry Facilities

We have two washers and dryers in-house located adjacent to the loading dock and have additional hook-ups for one more washer and dryer.

Data and Phone Lines

There is a \$100 per line fee for data and phone connections

Arena Level

A typical Star Dressing Room.
Furniture, plants and lighting fixtures can be provided in-house.

Two of our four locker rooms with the air wall removed.

Crew catering seats 80 and includes dimmable lighting, big screen TV, ample power and plenty of room for touring personnel.

Production Equipment

Stage

We own and maintain a 60'x80' stage deck and 16'x20' wings manufactured by StageRight®. All stage decks are height adjustable from 48" to 72" and can be rolled into position after assembly.

Barricade

80' of StageRight® CC-500 crowd control barricade, with a large stock of Tensabarrier® stanchions and bike rack.

Mix Position

20'x24' StageRight® risers, height adjustable from 12" to 24".

Follow Spots

Eight Xenon 3K Gladiator III follow spots located in the grid. One position located at each corner and a platform for 4 positions 270 ft. from down stage center. Each spot location has a hardwired low voltage connection for Clearcom®.

Forklifts

Three Hy-Tek® fork lifts are available, one 5000lbs. and two 8000lbs. Two operate on propane. All forklifts have a maximum height of 184" and have side shifter. Only OSHA certified forklift operators will be operating the forklifts in our facility.

Scissor Lifts

One JLG scissor lift is available with a maximum working height of 26'.

If you have any questions about our equipment please contact the venue's Production Manager at 614-292-9230

Technical Specifications

Rigging

Our rigging grid has a variety of different sized bays (See diagram for reference). Distance from the concrete floor to the bottom of the low steel is 97' and can accommodate the largest of productions. Rigging is only permitted on the low steel.

Pyrotechnics Permits

Pyrotechnics must have approval at least 10 days prior to the event. A permit must be acquired and all pyrotechnic productions must utilize a member of Hamburg Fireworks as the local shooter. They can be contacted at (800) 310-2666. Information on permit packets can be obtained from the Columbus Fire Department at (614)645-7641.

House Sound

Four speaker clusters are hung equally spaced around our central scoreboard. The speaker clusters utilize 66 EAW® enclosures and are powered by Crown® amplifiers. The audio is managed by the BSS London® digital control system.

House Lights

Automated Logic® console controls all televisions, emergency and architectural lights. We also utilize a quartz house lighting system for special events which is fully dimmable.

Video Production

Triax, coax, audio and data lines are available on every level in a variety of locations for a fee. All connections terminate in the broadcast room on the arena level adjacent to the loading dock. Shore power is available outside of the video room in the service court for production trucks. A fully digital, state-of-the-art video production studio with three cameras, slow motion and graphics is available for image magnification on our center hung four sided, high definition scoreboard or for transfer to tape and live broadcast.

Intercom & Backstage Paging

The venue utilizes a four channel Clearcom® system with portable headsets and belt pack stations and seven wall stations, four located in the Star Dressing Rooms, one in Engineering and one in each of the double locker rooms in the Star Complex.

For additional production capabilities please contact the facility's Production Manager at
614-292-9230
